## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8, 11-23, 25-34, and 36-43 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-8, 11-23, 25-27, and 41-43, there being included a "stabilizing agent" that is "a surface attached ligand, polymeric coating, metal coating, semimetal oxide coating, or metal oxide coating" is a distinguishing feature of the claimed "printable composition" (i.e. claims 1-8, 11-20, 42, and 43), "substrate having a printable composition printed thereon" (i.e. claims 21-23 and 25-28), and/or "system for forming conductive paths on a substrate" (i.e. claim 41).

Regarding claims 28-34 and 36-40, the Kirkor et al. reference was sworn behind (Declaration under Rule 131 dated 6-6-05), and the other art relied on for rejection is directed to "field emitters" and "ESD coating," which include "conductive paths"; yet the references other than the Kirkor et al. reference do not suggest advantages of applications for forming a conductive path that is "a trace, (part of a) transistor, resistor, inductor, gate, diode, (part of a) capacitor, magnet, or combination thereof," as recited in claim 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
